

## American-Made Metal Roofing & Siding

Metal America® delivers complete solutions for your roofing and siding needs. As a steel coil processing facility that manufactures our own products, we offer an ever-growing variety of panels and trim profiles at competitive prices.

## Driving the Roll Forming Industry Forward

We mesh the newest equipment with our unique experience in metal installation to provide a tested product fit for roofing, siding, and interior. You can rely on our expertise to help you choose the best metal for your unique project.

## Roll Forming Done Right

With over 30 years of installation experience, Metal America® specializes in roll forming steel panels, including Tuff Rib, 7/8 corrugated metal, and mechanically seamed roofing and siding.

## Specialty Finishes

Our high-resolution Wood Grain Finishes and natural Cor-Ten® rust patina offer the beauty of wood and aged metal with all the functionality of premium steel. Available in a range of profiles and matching trim.

## Discover Craftsmanship

Explore our full lineup of roofing, siding, and soffit panels at [www.metalamerica.com](http://www.metalamerica.com).

## All-American Production

Choosing us means supporting an all-American production cycle. Metal America® proudly leads in innovation and sustainability by using lower-carbon-emission steel. All of our panels are made in the USA, in Post Falls, ID.
